

**CAT: “...IF THE SCRAP DOESN'T GO TO THE SHEAR...
THE SHEAR GOES TO THE SCRAP”**

“CAT”, the shear baler on trucked vehicle that adapts to your working needs. You will decide where you want to make it work, it will follow you.

It's not a new idea, it's just a brilliant idea.

The shear baler has 2 independent remote controls, one for the shear baler and the other one for tracks:

“2” is for safety,

“2” is for ease of use;

“2” is for not making mistakes,

“2” is because there are 2 machines that make up the unit.

The shear baler “CAT” series are made up of a single self-supporting monolithic structure.

The “CAT” shear is equipped with the original TAURUS SB compression box with over-stroke on both wings.

BALER SHEAR "CAT"		CAT8	CAT10	CAT11	CAT12
Shear cylinders	n.	2	2	2	2
Cutting force	t	800	950	1100	1200
Cutting width	mm	1000	1000	1100	1100
Clamp	t	✓	✓	240	360
SB: Swinging wings compression system		SB	SB	SB	SB
Over stroke on both wings with 90° stop		✓	✓	✓	✓
Open box dimension	mm	2500x7200	2500x7200	2600x7200	2600x7200
Cylinders for each wing	n.	3	3	3	3
Main compression cylinder	t	150	150	150	150
Diesel engine	hp	280	400	400	500
